

Guarding Against Deceptive Tactics: Phishing Awareness Training

Name : Jeevashree
Roll no : 22UEO021
Branch:Cse

Introduction to Phishing

Welcome to **Phishing Awareness Training**. This presentation will equip you with the knowledge and tools to identify and prevent **phishing attacks** in the workplace. Stay vigilant and protect your organization's data.

Understanding Phishing

What is **phishing**? It is a fraudulent attempt to obtain sensitive information such as usernames, passwords, and credit card details by disguising as a trustworthy entity. Phishing attacks often occur via email, phone calls, or text messages.

Common Phishing Tactics

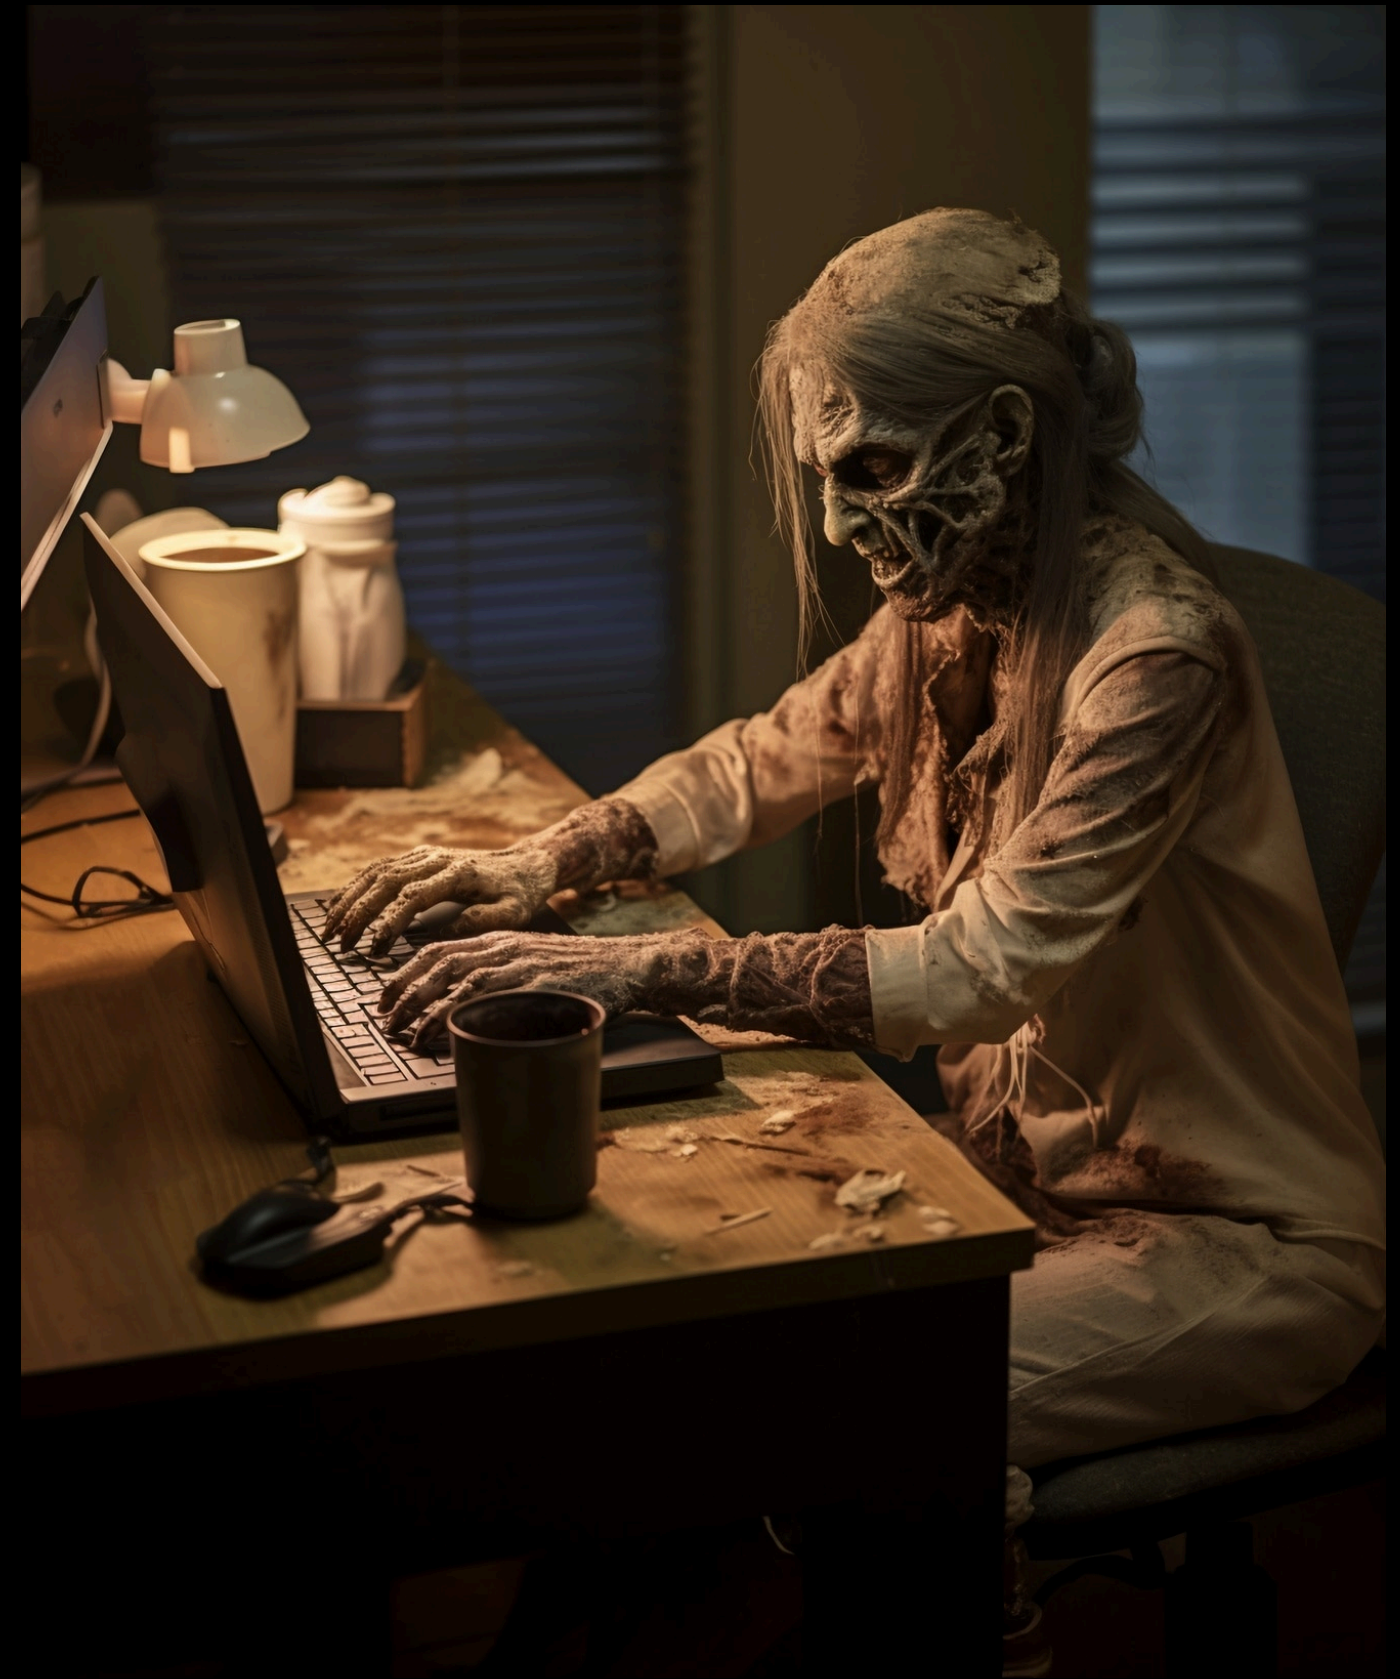

Be aware of common **phishing tactics** such as urgency, fear, and curiosity.

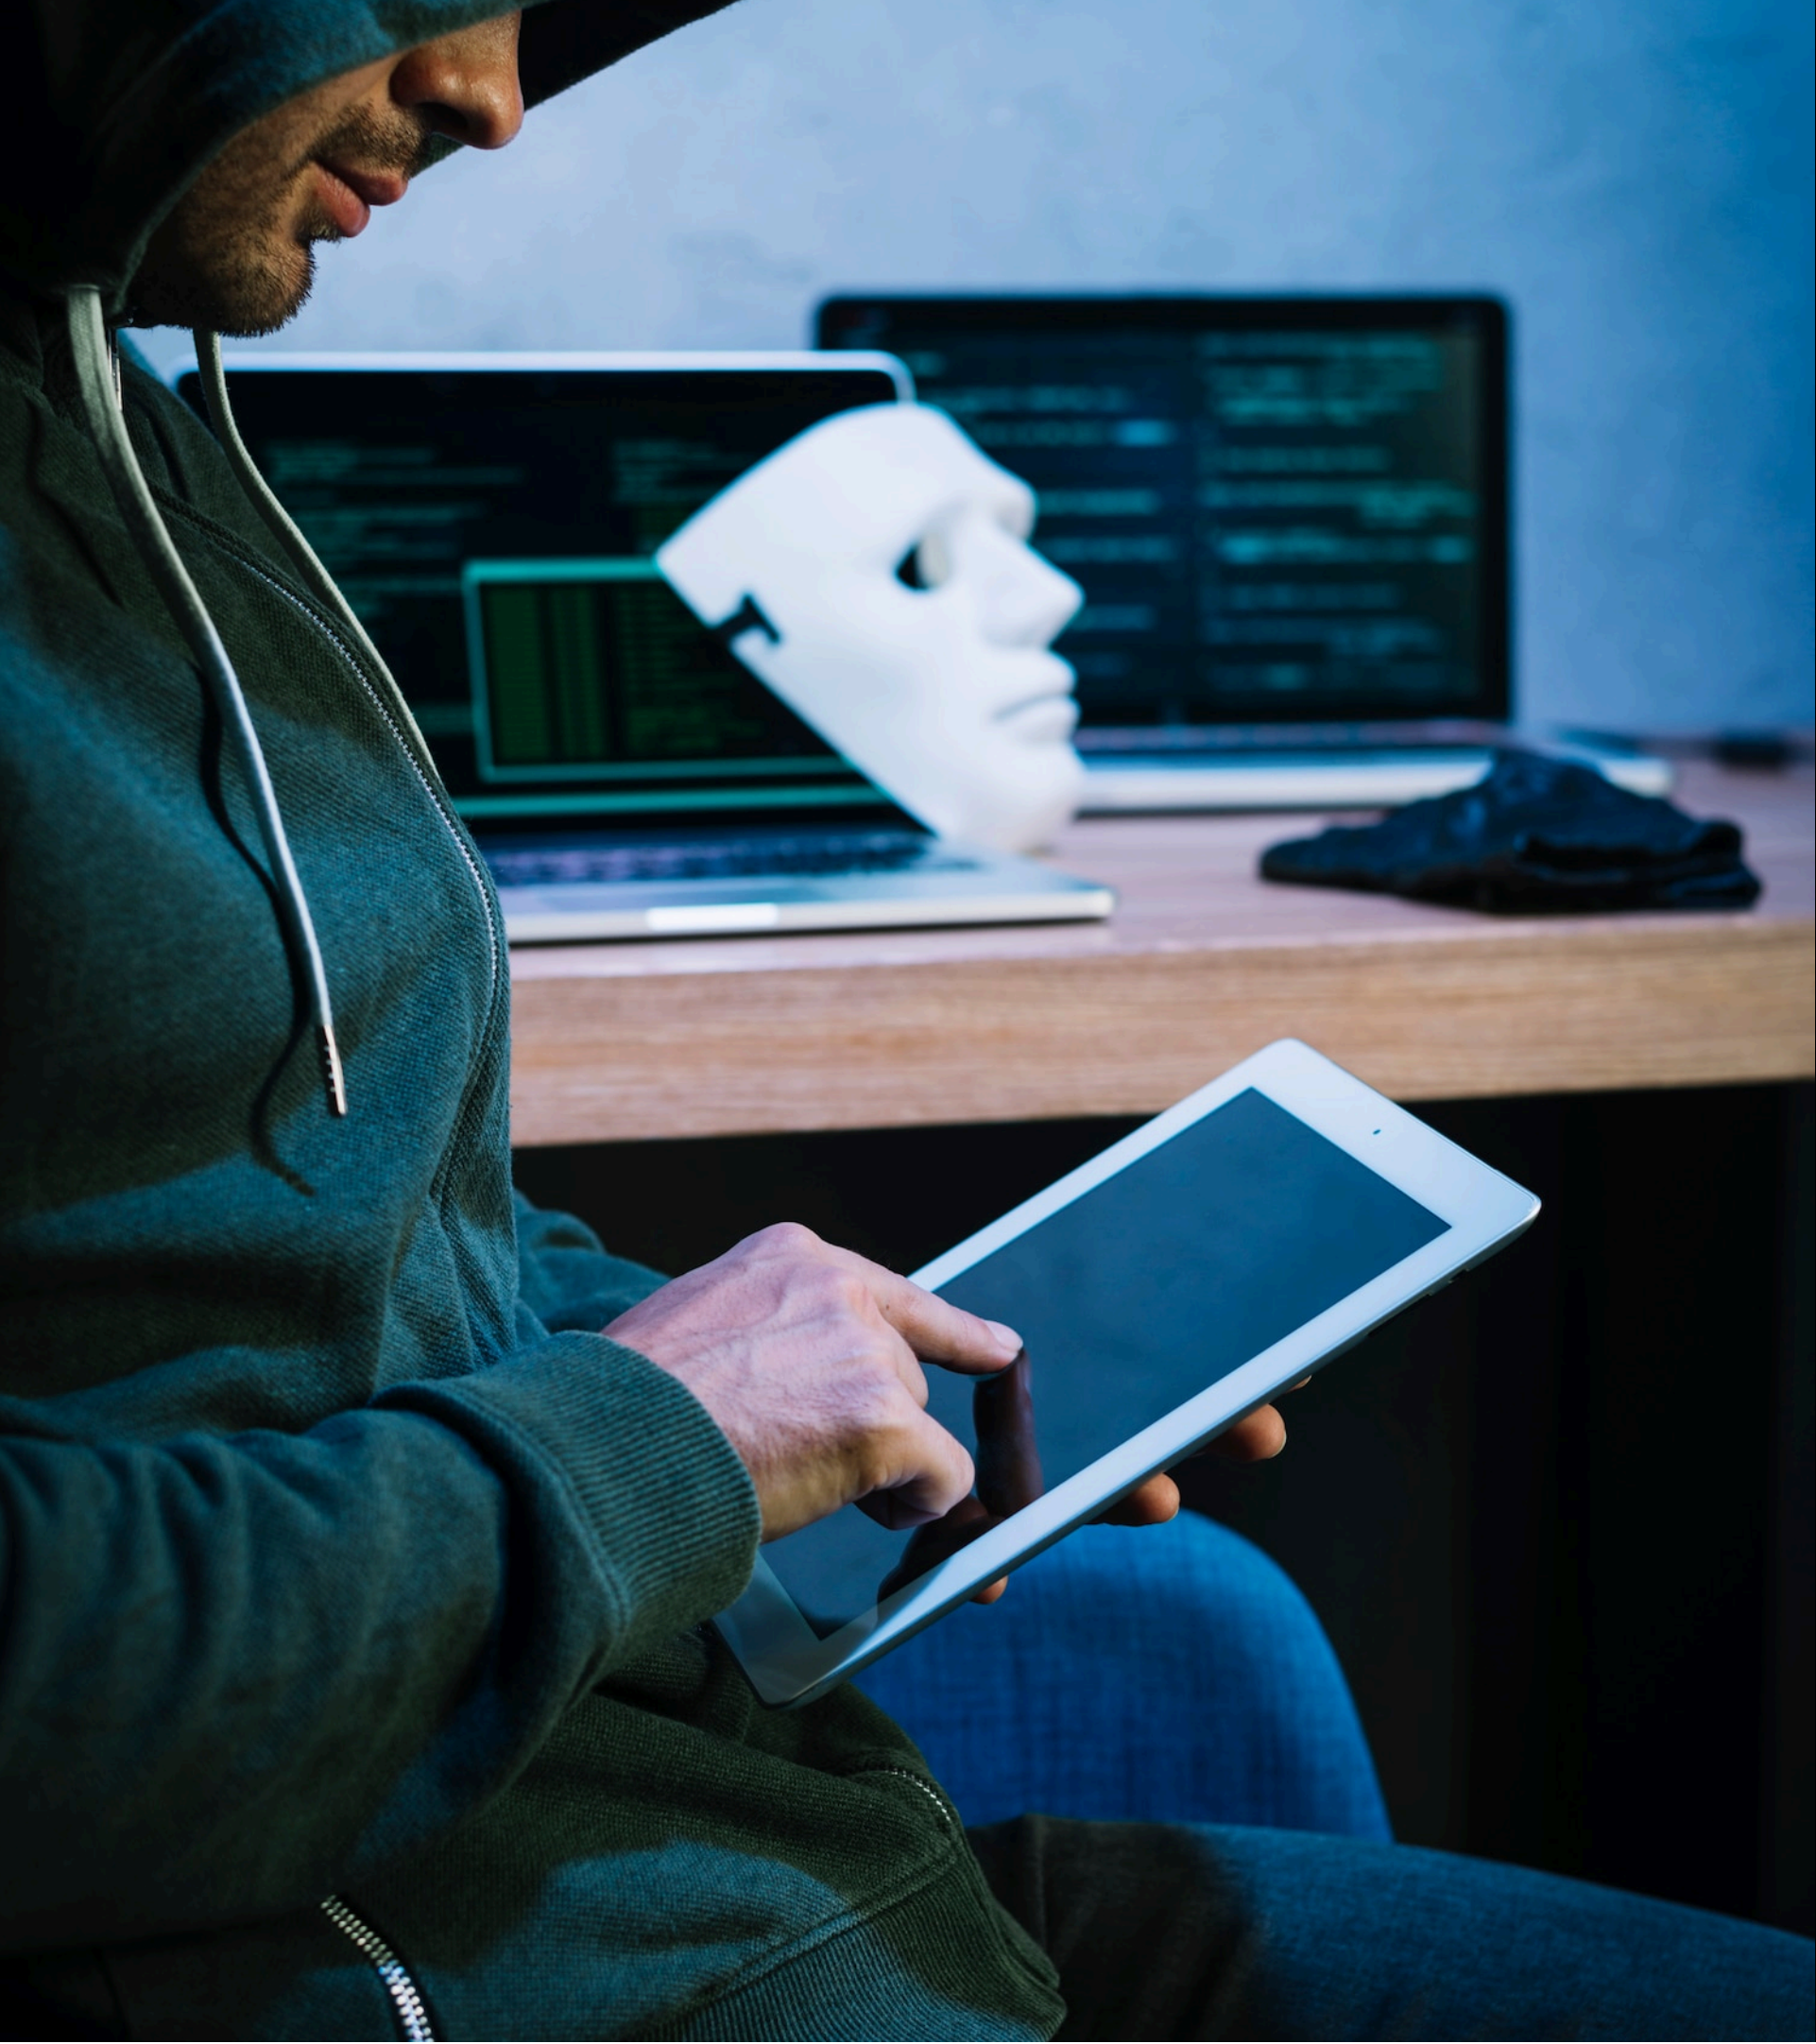

Attackers often create a sense of urgency to prompt immediate action, instill fear to manipulate emotions, or spark curiosity to entice clicks on malicious links.

Spotting Phishing Emails

Look out for **red flags** in emails such as generic greetings, spelling and grammar errors, and suspicious links or attachments. Always verify the sender's email address and avoid clicking on any links or downloading attachments from unknown sources.

Protecting Personal Information

Safeguard your **personal information** by being cautious about the information you share online. Avoid providing sensitive details to unknown sources and regularly review your privacy settings on social media platforms.

Reporting Suspicious Activity

Encourage a culture of **reporting** within your organization. If you encounter a potentially malicious email or website, promptly report it to your IT or security team. Your vigilance can help prevent security breaches.

Training Recap

Congratulations on completing the **Phishing Awareness Training**. Remember to stay alert, be cautious of deceptive tactics, and report any suspicious activity. Together, we can strengthen our defense against phishing attacks.

Conclusion

Thank you for participating in the **Phishing Awareness Training**. By staying informed and vigilant, we can collectively mitigate the risks of phishing attacks and protect our organization's sensitive information. Stay safe and secure!
